COMP3006 — Full-Stack Development

Coursework Proposal – Feedback

Autumn 2020

Title: **Video Game Review Site**

The scope of the proposed project:
- ☐ Is appropriate.
- ☑ Should be increased.
- ☐ Should be reduced.

Specific comments:

You have described a site that uses the database well. I am not convinced that this is a good use of websockets - why not use client-server for updating the database. Websockets should be for notifications, chats etc. After Lecture 9, have a think and then let me know how you would like to include them. There is a good test plan. You could have included projected times for the tasks you plan to undertake.
